The Schools' Teams results take account of every competitor's results (every runner counts) and the size of each school's teams. They are calculated by summing the total number of points scored by each school in each of the four categories, where first place scores 1, second place scores 2 etc. For each school, the average number of points per runner is calculated from the total points and the number of runners who contributed to those points. Then a weighted average is calculated based on the proportionate size of each school's team (proportion of the total number of runners in that category). The smallest number represents the highest place.
